

New location - same quality service and craftsmanship

Bildit is on the move. Clients are now welcome to visit the brand new workshop and office building and office building complex at 290 Jubilee Hwy West (right beside Conboy's Nurseries.) There is now plenty of parking (shared with the nursery), so Bildit is easier to find and much more accessible. Have a look at the great new workshop facilities where Bildit manufactures a wide range of steel products and you can discuss with them exactly what you need in the more comfortable customer service centre. How would you like to have a shed or other steel structure that has been designed and

made exactly to suit your needs? Well, this local firm works hard to make this possible for you. The MegaSpan® building range is designed to be very adaptable and the specifications can be tailored to suit the specific requirements, features and budget of individual customers. Features include universal beams as columns supporting the welded RHS webb trusses. Typically, all structural steelwork is hot dip galvanized after manufacture to ensure durability. Building features may include roller doors, hi-beam openings, vent ridges, partitions, concrete flooring, skylights, PA doors, side canopies, roof insulation, crane rails, etc, etc. The aim is to provide clients with a specialized structure that is cost effective, long lasting and truly functional. As Bildit makes solid steel sheds of a very high quality, the team has no hesitation in backing products with a 12 year structural warranty. Over many years, Bildit has developed very close working relationships with a number of local specialists whose contribution to the final product or service is vital. Working beside the in-house team are engineers, specialist suppliers, transport and erection contractors. Together, we can provide a complete service. Bildit Industries is a family owned engineering company based in Mount Gambier specialising in the

design, manufacture and erection of a range of steelwork products and services, but their specialty is the supply of custom made large buildings for industrial, commercial or rural clients. While the main areas serviced are the South East of SA and the South West of Victoria; Bildit also supplies specialised buildings and steelwork Australia wide. With friendly and professional staff, the business is increasing its position as a market leader in quality, custom built industrial, commercial and rural sheds. Bildit is also very proud to be the sole agent for Olympic Industries in the South East region. Through Olympic and other suppliers, Bildit is also able to service the domestic market with quality toolsheds, garages, carports and verandas. So whatever your needs; ask the Bildit team to help develop a solution for you.

WEIR CONSTRUCTIONS PTY LTD

Proud to be associated with Bildit Industries over many successful years.

Weir Constructions is a Third Generation building company proudly operating since 1914. Our first Project in Mount Gambier was the Original Airport for the establishment of an Air Training School during WW2 which we were contracted to Design and Construct in 1939. We then set up a local office in Mount Gambier to service the South East of South Australia and that was the start of a long history of Proudly Building the Limestone Coast, we will be celebrating 75 years in 2014.

At some stage in that time Weir Constructions would have been involved in construction works within most Timber Mills, Schools, Hospitals, Aged Care, Potato Factories, Horse Racing Clubs, Football Clubs, Wineries, Office Fitouts, Government Buildings, Shopping Centres etc.
